Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 1-25 in the reply filed on 10/11/05 is acknowledged. The traversal is on the ground(s) that the apparatus cannot be used in the practice of a materially different method. This is not found persuasive because the apparatus can be used in a method of destroying the media on a drive that is outside of the scope of the method claimed as indicated in the restriction requirement.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 8, 12-15, 18-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rabinovitz (US 5822184) .

Rabinovitz discloses the modular data storage assembly substantially as claimed by applicant including the drive pack and guide rail systems, enclosures, fans etc. Rabinovitz fails to disclose the inclusion of one or more heaters for the drives. It is generally well known in the art of mass media storage on disc drives to provide a means for temperature control of the drive environment in order to maintain said environment and said drive within a temperature range that

Art Unit: 3742

is appropriate for operation. Evidence of the common use of heaters on disc drives can be found in Hanada et al. (US 6967813) and Smith et al. (US 6735035). Both Hanada and Smith disclose the use of heaters operably coupled to disc drives as a means of maintaining the proper operating temperature for the drive. It would have been obvious to one of ordinary skill to add a means of heating the drive units of Rabinovitz in the image of the heating systems known in the art and described in Hanada et al. and Smith et al.

Allowable Subject Matter

Claims 4-7, 9-11, 16-17, 24-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thor S. Campbell whose telephone number is 571-272-4776. The examiner can normally be reached on Mon-Fri 5:30AM-2:00PM.
